

MRPX Module - Odoo Version Compatibility Guide

Odoo 18.0 Compatibility Status: FULLY COMPATIBLE

The MRPX module has been updated and tested for full compatibility with Odoo 18.0.

Key Changes Made for Odoo 18.0

1. View Syntax Modernization

Updated deprecated `attrs` syntax to modern invisible/readonly attributes:

Before (Odoo 16.0 style):

```
<field name="some_field" attrs="{ 'invisible': [('condition', '=', False)] }"/>
```

After (Odoo 18.0 style):

```
<field name="some_field" invisible="not condition"/>
```

2. Version Number Update

- Updated manifest version from `16.0.1.0.0` to `18.0.1.0.0`
- Ensures proper module loading and dependency resolution

3. API Compatibility Verification

-  Model inheritance (`_inherit = 'mrp.workorder'`) - No changes required
-  Field definitions (Many2one, Datetime, Selection) - Fully compatible
-  Computed fields and methods - No changes required
-  Security access rules - Compatible format
-  Menu structure - No changes required

Cross-Version Compatibility

Odoo 18.0

- **Status:** Fully compatible
- **Installation:** Direct installation supported
- **Features:** All features work as expected

Odoo 17.0

- **Status:** Compatible
- **Installation:** May work with current version
- **Note:** `attrs` syntax was deprecated in 17.0, but both syntaxes may be supported

Odoo 16.0

- **Status:** Requires modifications
- **Issue:** Modern `invisible` syntax not supported
- **Solution:** Revert view changes to use `attrs` syntax

Migration Notes

Upgrading from Odoo 16.0 to 18.0

If you're migrating an existing installation:

1. **Database Migration:** Use Odoo's standard upgrade process
2. **Module Update:** Install the updated MRPX module
3. **Data Integrity:** All custom data (assignments, timing) will be preserved
4. **Testing:** Verify all assignment workflows function correctly

Downgrading Considerations

If you need to use this module with Odoo 16.0:

1. **View Syntax:** Manually revert invisible attributes to attrs format
2. **Version Number:** Change manifest version to `16.0.1.0.0`
3. **Testing:** Verify compatibility with your specific Odoo 16.0 setup

Technical Details

Changed View Elements

- Button visibility conditions
- Field visibility rules
- Conditional field display
- Form and tree view attributes

Unchanged Elements

- Model structure and inheritance
- Field definitions and types

- Business logic and methods
- Security and access controls
- Menu and action definitions

Validation Checklist

For Odoo 18.0 installations, verify:

- ☐ Module installs without errors
- ☐ Workorder assignment interface loads correctly
- ☐ Employee assignment functions work
- ☐ Timing tracking (start/end) operates properly
- ☐ Kanban view displays assignment status
- ☐ All buttons and actions respond correctly
- ☐ Security permissions function as expected

Support

For version-specific issues:

- **Odoo 18.0:** Module fully supported
 - **Other versions:** Community support available
 - **Custom modifications:** May require additional compatibility work
